### NADIUS SOLUTIONS

Project Manager & Developer | Lahore, Pakistan | May 2019 – Sept 2019

I identified the projects' scopes and planned their development; chalked out the production timelines, set up the milestones and either recruited freelancers to work on them or acted as the sole developer and designer. Furthermore, I helped maintain a consistent communication between the clientele and the team.

### VETERANLOGIX

UI/UX Designer & Developer | Lahore, Pakistan | May 2018 – July 2019

I oversaw the overall development, helped the team understand how to use Git to keep the work flow clean, acted as a supervisor and lead on issues aside from design and front-end development and streamlined tasks to improve productivity. Implemented new features while ensuring a seamless integration and did hotfixes as a dedicated support. Wrote clean, re-usable markup with a component-based approach and did user experience reviews for projects and handled all graphics-related jobs.

### HOBUDDIES (PVT) LTD.

Interim C.T.O. & Front-End Developer | Lahore, Pakistan | March 2017 – 2018

Improved the team's productivity by introducing a practical Git branching model and Agile; 20% improvement was observed overall. Communicated with the clientele to design intuitive layouts according to their needs while listening to their feedback. Streamlined the workflow using Git, introduced Trello and Scrumming for better work ethics. Created a seamless design for the apps and prototyped in Ionic. Handled all graphics-related jobs including logos, wallpapers, icons, banners, standees and whatnot.

### INNOVERSETECH

Graphics Designer | Lahore, Pakistan | April 2016 – March 2017

Designed graphics for the clientele that varied between digital and print media. Created all graphical resources for the assigned projects. Worked alongside the developers to create responsive layouts and themes. Wrote markup and functionality for websites using Javascript and jQuery.
